DAWIT HAILU

SOFTWARE ENGINEER · FULL-STACK & BACKEND DEVELOPMENT

+251 943 030 048 | dawith907@gmail.com | Addis Ababa, Ethiopia

Computer Science undergraduate and software engineer with hands-on experience building full-stack and backend systems in production settings. Comfortable designing REST APIs and relational data models in Java and Spring Boot, and delivering the interfaces that consume them in Angular, React and Next.js. Experience spans web platforms, desktop inventory software and AI-assisted tooling, with a consistent focus on clean application logic, secure authentication and maintainable code.

EDUCATION

Mekelle University
BSc, Computer Science
Third Year · Mekelle, Ethiopia

TECHNICAL SKILLS

LANGUAGES
Java, Python, TypeScript, JavaScript, SQL, HTML, CSS

BACKEND
Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication

FRONTEND
Angular, React, Next.js, Tailwind CSS

DATABASES
PostgreSQL, MySQL, SQLite

AI & MACHINE LEARNING
LLM APIs, NLP, RAG, Prompt Engineering, Embeddings, TensorFlow / Keras, PyTorch

TOOLS
Git, GitHub, Docker, Vite, Maven, VS Code

ADDITIONAL WORK

Developed further websites and web applications for local businesses, covering responsive frontend interfaces, backend services and database-driven business workflows.

EXPERIENCE

Backend Development Intern
Raras Technology Company · Addis Ababa, Ethiopia

- Built and maintained backend services and REST APIs, implementing core application logic and data access layers.
- Designed relational schemas and wrote queries supporting day-to-day application features.
- Debugged and resolved defects across the codebase, improving the reliability of existing endpoints.
- Contributed to the development of a Task Management System.

SELECTED PROJECTS

Taskflow — Full-Stack Task Management System
Angular 21 · Spring Boot 3.4.4 · Java · PostgreSQL

- Engineered a multi-user task platform secured with JWT authentication and user-scoped data access.
- Implemented full CRUD operations with search, filtering, sorting and pagination.
- Added task priorities and due dates, surfaced through a grouped, ClickUp-style interface.

MN Construction / HCB Factory Inventory System
Python · PyQt5 · SQLite

- Delivered a desktop inventory application for a concrete block and tile factory.
- Structured product, stock and supplier records in a local relational database.
- Automated recurring business workflows previously handled on paper.

AnswerFlow AI — Browser Extension
React · TypeScript · Vite · Tailwind CSS · Node.js · Express · PostgreSQL

- Developed a Manifest V3 extension with a multi-provider architecture for switching between AI services.
- Automated question processing through a dedicated backend API and persistence layer.

Local ERP / Business Management System
Database-driven business application

- Built inventory and operational management modules around relational data workflows.

Wina Juice — Business Website
Next.js · TypeScript · Tailwind CSS

- Designed and shipped a responsive production website for a local food and beverage business.
